

Artificial Intelligence AI

1956

John McCarthy

It is a program that can sense, reason, act and adapt like human or try to mimic human behaviour.

Machine to mimic human behaviour

Machine Learning ML CPU

1959

Arthur Samuel

It is an algorithm that tries to improve the performance as they are getting experience with more data over data.

Machine to 'Learn'

Training Time: Less
Testing Time: More

Deep Learning DL GPU

Training Time: More
Testing Time: Less

2000

Igor Aizenberg

It is an algorithm that is inspired by the structure and functioning of human brain.

WHY?

✓ Huge Data

✓ Complex Problems

✓ Feature Extraction

ML. 86.78%
DL - 83.89%

Big Data

High Storage
High Computation Power
High GPU
High Cost
High Config System

Medical field
Robotics
Self Driving Cars
Translation

DL

ML

Performance

Data

Artificial Neural Network - ANN

Neuron

ANN

CNN - Computer Vision & Image Processing

RNN - NLP (NATURAL LANGUAGE PROCESSING)

Autoencoders & GANs
